

Innocket Vario-Drive* – New “drive” for your labelling equipment

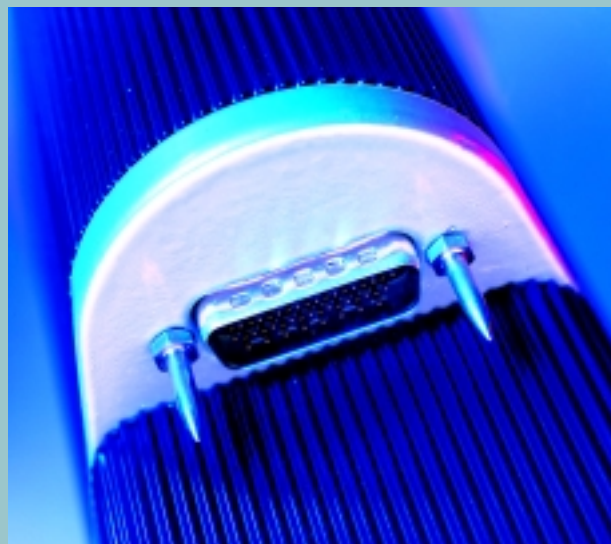

* patent pending

- _ You can forget about reverse container rotation.
No more time delays. Your labeller runs smoothly.
- _ You can combine gluing and self-adhesive applications on a single machine.
Two labelling processes in one. You save time and the cost of investment.
- _ Significantly fewer mechanical components.
No grooved cams. No bottle turret gears.
You save installation effort, time and money.
The machine availability is increased considerably.
- _ Container turret, motor, and the electronics comprise one plug & play unit.
You save on wiring, have fewer interfaces and thus fewer sources of error.

- _ Turn it as you like ...
... and you can label any container format with any dressing on one machine with the new Vario-Drive from KHS. Absolutely perfectly. Without any loss of performance!
- _ You specify the container rotation. According to the format. According to the dressing.
Your labeller has never been so flexible.
- _ Subsequent changes and expansion of equipment are no problem.
You can react immediately to new trends, marketing strategies, and market requirements.

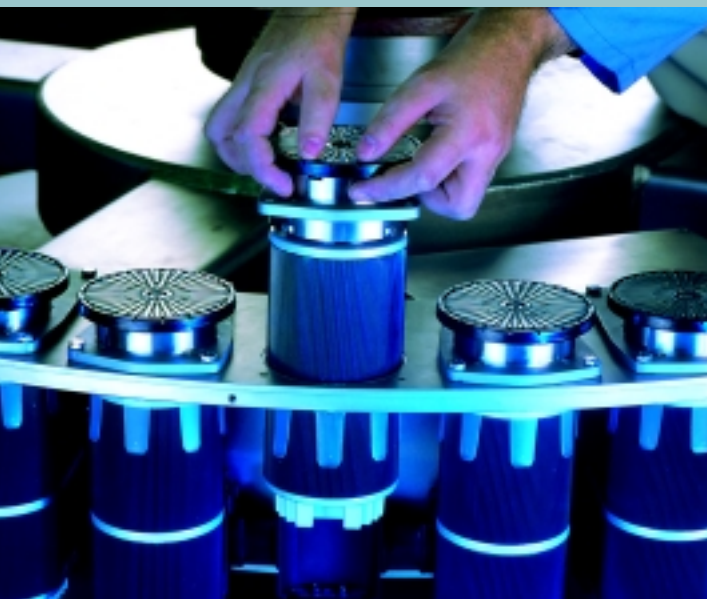

Innocket Vario-Drive

Other advantages of the Vario-Drive

— The Vario-Drive is impervious to splash water.
Problem-free machine table cleaning.

— Container rotation in any direction possible for cold-melt labelling.

You can label all container sizes, shapes, and dressings on one KL 2000. This means optimum use of your investment.

— For rollfed labelling: No cam or belt drive replacement necessary format changeover.

For you this means time saved and increased performance. And you save plenty on the cost of maintenance as well.

— For self-adhesive labelling: The Vario-Drive ensures perfect bottle rotation.

You make the most of machine performance.

— For container alignment: Automatic sensor or camera-controller positioning and alignment.

You save time thanks to faster container alignment and avoid the decrease in performance common in the past.

— Innoket Vario-Drive – more drive for your high-capacity labelling range:

Labelling up to 70,000 bph

Aligning up to 60,000 bph
